

1. Preface

Muhr Metalltechnik GmbH specializes in the development of stamped body parts and welded assemblies for the automotive industry. Leading automotive manufacturers and suppliers of automotive components worldwide rely on our many years of experience in the industry. Effective environmental protection was and is an essential factor in our business activities. Our environmental management system is an integral part of our integrated management system. Muhr Metalltechnik GmbH is certified according to ISO 14001 and has committed itself to the following guidelines as the basis of its environmental policy:

2. Environmental policy guidelines

- Environmental protection is future-proof: We are all required to protect the environment because it forms the basis for future life.
- Environmental protection is a management task: Responsibility for the environment must be a corporate philosophy and must be lived and practiced at all levels.
- Environmental responsibility must be shared: Muhr Metalltechnik GmbH demands from its suppliers and expects from its customers to implement the idea of environmental protection in the supply chain.
- Environmental management is a strategic task: We do not see environmental management as a risk, but as an opportunity and thus as a competitive advantage.

The concrete action steps for pursuing our guidelines are recorded and described in our integrated management system.

As the basic framework of our action premise, we see the obligation to

- to comply with all environmental laws and regulations applicable to us.
- to provide factual information to our customers and contractual partners as well as to the public.
- to cooperate consistently with authorities and rescue organizations in order to minimize the risks and consequences of emergencies by means of suitable preventive measures and emergency plans.
- to avoid environmental damage in our operations and to use the best available technology as far as economically justifiable.

- to continuously promote the environmental awareness of our employees through training measures.
- to continuously monitor and improve our environmental performance.
- to use resources and energy in a targeted and economical manner in order to minimize the occurrence of environmentally harmful emissions such as noise, residual materials, waste and waste water.
- to determine the environmental impact of existing and forward-looking as well as new activities, products and services in order to be able to take appropriate measures to protect the environment.

In order to sustainably promote and implement our goals and to underline our ecological responsibility, Muhr Metalltechnik GmbH has joined the VEA initiative Climate-Friendly Medium-Sized Businesses. This initiative supports medium-sized companies to act in a more climate-friendly way and to save CO₂.

Join in!

With this slogan, we not only want to drive continuous improvement in our processes, but also work to act in a more climate-conscious manner, reduce CO₂ emissions and continue to produce in an economically competitive manner.

Wenden-Altenhof, the 07.05.2021
